RWS Language Weaver

The risks with translation…

Financial Services organisations increasingly need to create multilingual content to access new markets, engage a global audience, and stay competitive.

This is a serious challenge for global enterprises.

Applications

Language Weaver Edge

Language Weaver

- Documents are processed locally
- PDF conversion / File filtering is performed locally
- Local translation is supported (selected model, guaranteed throughput)
- Adaptation is performed locally

- Segments are processed in Cloud (not documents – documents remain on Edge)
- All languages are available
- Adaptive models can be deployed in Cloud
